FEW would admit they love cleaning. But for Chambers Flat mother-of-three Sue Inch, it is her passion.

She loves it so much she describes herself as a real cleaning addict.

"I know it may sound funny, but I am really addicted to cleaning," she said.

"I love the feeling and satisfaction you get once everything is clean and it sparkles."

Mrs Inch has found a way to combine her passion for keeping things clean and making a living.

For the past decade she has been selling the environmentally-friendly Enjo cleaning products, a range of microfibre cloths, gloves and brooms which eliminate the need for using bleach and other chemicals around the home.

It is that passion and love for Enjo products that helped Mrs Inch sweep her way into the top Enjo ambassadors world-wide.

"Earlier this year, I was recognised as Queensland's top Enjo consultant as well as the state's top recruiter," she said.

"I received these awards for not only selling the most Enjo products in the state, but also hiring the most number of people in my team.

"I have 94 people on my team, ranging from 65 years old to 18-year-olds, spreading from the Sunshine Coast to Brisbane. the Gold

Coast and Toowoomba.

"When I was told I had won, I was really pleased and honoured to be named the state's top Enjo supporter."

In addition, Mrs Inch is also ranked fifth in the world for her commitment to Enjo.

"Working for Enjo gives me the opportunity to travel all over the world, which is fabulous," she said.

"While I was in Paris, I actually won an award for placing fifth in the world as an Enjo recruiter.

"That was a really lovely surprise. "Next time, my goal is to be number one."

For reaching her sales targets, Mrs Inch will be travelling to Austria in the coming weeks, where she will meet with the owner of Enjo and tour the factory where all Enjo products are made.
